

The Jacobean

The Jacobean is a practical quadrilateral shaped conservatory available in three stylish colours. This style of conservatory gives a traditional look and is ideal for small houses and floor space. The Jacobean is as functional as it is alluring and can add a sense of style to any property whether it's old or new, the Jacobean blends in to its surroundings comfortably. With its firming the Jacobean displays an enhanced style as apposed to the minimalist lean to conservatory. Though the manufacturing techniques and materials are ultra modern they will still accommodate those looking for a more historical or traditional simple feel but with that little bit of extra style.
